Bespoke Portal

The In2itive core platform provides the technology that enables us to design and develop Bespoke Portals for organisations with multiple sites or remote audiences in any location world-wide. We work with you to create your own personalised on-line facility for easy, fast communication and centralised storage and distribution of the latest versions of your key applications, documents and information feeds.

Fully hosted and managed on your behalf, the In2itive Bespoke Portal enables you to get up and running fast, and to gain early returns-on-investment, increasing efficiency and driving down costs. This comprehensive solution enables you and your employees, business associates and customers, to communicate and interact in 'real-time' 24x7, via any standard Internet connection.

In2itive Bespoke Portal is ideal for:

- Supporting your intranet, extranet and Internet communications
- Low-cost deployment to store/distribute key software applications
- Controlling and reducing your ongoing IT infrastructure costs
- Enhanced communication with remote workers and customers
- Enhancing customer service and help-desk support/training
- Increasing productivity and motivation through collaboration
- Optimising knowledge-share and reducing duplication of effort
- Keeping your audiences up-to-date with your key industry issues

Enterprise Portals with a Difference

With our Premier Bespoke Portal option, we build In2itive Knowledge Management into your portal at no extra cost, giving you a powerful and practical solution to fully exploit and share the existing information and knowledge within your organisation, to enhance performance and to reduce your operating costs.

The In2itive Bespoke Portal offers your organisation many benefits, and includes a range of comprehensive features that have been designed to offer you the flexibility to meet your ongoing needs, making your life easier. You can select whatever software and content you require from your own existing business, and other third party sources.

Practical Benefits

- Flexible content to meet your requirements
- Ready-to-go modules and bespoke modules
- Easy-to-use solution with user-friendly interfaces
- Web-enable any application or business process
- Easy deployment avoiding errors during installation
- One-stop deployment of software and upgrades
- Fast, on-line distribution of latest software
- Licensed, avoiding need to invest in expensive IT*
- Scalable solution to meeting your growing needs
- Fully managed and hosted on your behalf

Practical Features

- Bespoke portal web-part modules can include:
 - Chatroom facility for easy interaction
 - Latest national and industry news feed
 - Industry-specific product/competitor info
 - Web-links and content of your choice
- Website and portal design & build service
- Full user profiling and usage analysis facility
- Settings remembered for each portal visit
- Password and rights control of user access
- Option for bespoke logo and interfaces
- Individual user subscription and billing details
- Key Performance Indices to monitor capacity

Our web-enabled solutions and third party applications integrate to your portal:

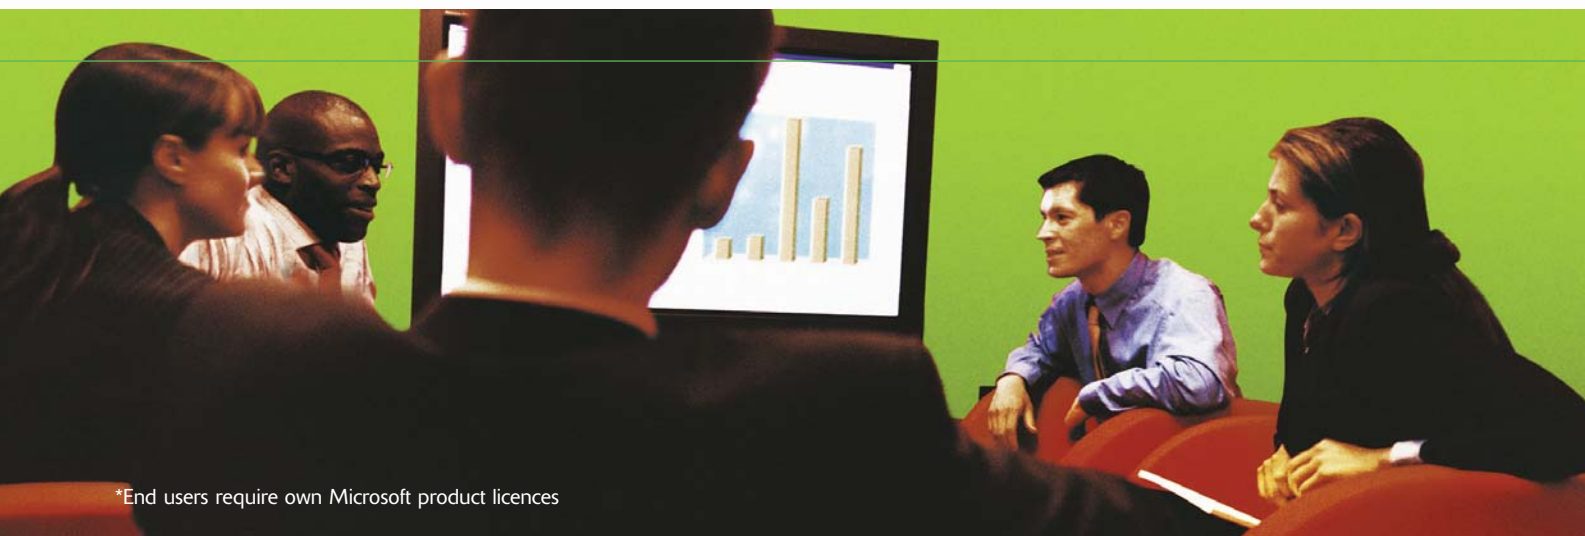

In2itive Knowledge Management: store, search, retrieve and share your existing knowledge

In2itive Web-Conferencing: low-cost on-line meetings and training with Voice Over IP option

In2itive Virtual Marketing Arena: on-line demonstration facility for software houses and ISVs

Gold Partners Scheme: ready-to-go content from selected software and information providers
